

“BUY ALFLEX SOLID – SUPPORT LOCAL AUSTRALIAN INDUSTRY”

Did You Know?

ALFLEX SOLID is manufactured in South Korea from Raw Aluminum ingots that are produced in Australia.

“YES”

The Australian Ingot suppliers, **Rio Tinto**¹ (Bell Bay, Tasmania) and **Alcoa of Australia**² (Portland, Victoria) represent some of the largest producers of Aluminium in the country, with over 4,500 employers between these two long-established Australian companies. Unwrought Aluminium itself represents a major export item for Australia with a significant proportion destined for the South Korean market.

- **Alcoa of Australia** has been operating for more than 57 years, adding value to Australia’s local, state and national economy, directly supporting 1,425 local businesses and injecting AU\$ 1.1 billion into federal governments through the payment of taxes and charges³.
- **Rio Tinto’s** Bell Bay operation, the longest running smelter in the Southern Hemisphere, has been supporting generations of local Tasmanian families through employment, community support and local investment since 1955.

Raw Material Produced in Australia

Finished Product Manufactured South Korea

ALFLEX SOLID is a 3mm Pre-Finished Solid Aluminium Panel manufactured in a state of the art continuous **Roll coating** method production facility using the raw material from Australia. It features a **PPG Duranar Fluoropolymer** based paint system and come with a manufacture direct warranty.

ALFLEX SOLID is a 100% Aluminium product that has no core material giving the product superior non-combustibility as per BCA C1.9 as a deemed-to-satisfy (DTS) product.

ALFLEX SOLID is exclusively distributed nationwide by Australian-owned CSP Architectural Pty Ltd
